The yield point is the point on a stress-strain curve that indicates the limit of elastic behavior and the beginning of plastic behavior. Yield strength or yield stress is the material property defined as the stress at which a material begins to deform plastically whereas yield point is the point where nonlinear (elastic + plastic) deformation begins. . Prior to the yield point the material ...

Crystal twinning occurs when two separate crystals share some of the same crystal lattice points in a symmetrical manner. The result is an intergrowth of two separate crystals in a variety of specific configurations. The surface along which the lattice points are shared in twinned crystals is called a composition surface or twin plane.

Fix #7b: The most extreme of the fixes. Only consider this fix as an absolute last resort before tossing the camera, as there's some obvious potential for further damaging your camera by using this method. You especially might consider this if the lens barrel appears obviously damaged, bent, or crooked such as from a fall. In that case, try thinking of the lens as a dislocated shoulder.
