In chemistry, a solution is a special type of homogeneous mixture composed of two or more substances. In such a mixture, a solute is a substance dissolved in another substance, known as a solvent. The mixing process of a solution happens at a scale where the effects of chemical polarity are involved, resulting in interactions that are specific to solvation.

Solution - Wikipedia

The NRICH Project aims to enrich the mathematical experiences of all learners. To support this aim, members of the NRICH team work in a wide range of capacities, including providing professional development for teachers wishing to embed rich mathematical tasks into everyday classroom practice.

Prognosis: Dogs that recover from hot spots frequently go on to develop recurring lesions related to the primary underlying cause (i.e. allergy, parasites, etc.). Therefore, identification and elimination of the factors that contribute to hot spot formation are essential for controlling the development of these lesions.
