Though it's generally recommended to use the 'Default for display' screen resolution option, Mac users who connect their computer to an external display or TV may find it helpful to be able to see, access, and use all possible display resolutions for a particular screen. This can be particularly useful if a display is either showing at an incorrect screen resolution, or if you'd like ...

How to Show All Possible Screen Resolutions for a Display ...

640x480 "VGA" resolution is the lowest-common-denominator - by definition all PC's, graphics adapters and monitors must support at least VGA. Because it's the one thing that can be counted on to work, and always work regardless of your hardware selection, it's often used as the fallback when troubleshooting, or the default if your computer doesn't know it can do any better.

Why is 640x480 my only resolution option? - Ask Leo
