The horse (*Equus ferus caballus*) is one of two extant subspecies of *Equus ferus*. It is an odd-toed ungulate mammal belonging to the taxonomic family Equidae. The horse has evolved over the past 45 to 55 million years from a small multi-toed creature, *Eohippus*, into the large, single-toed animal of today. Humans began domesticating horses around 4000 BC, and their domestication is believed to have ...

Fossil fuel resources have been exploited extensively since the beginning of the industrial revolution to meet the ever rising energy demand. Due to the economic development of emerging countries (BRICS countries) and the exponential growth of the human population, there is a substantial pressure on the demand for energy and goods. This leads to an upsurge in fossil fuel consumptions.

This is the first entry in a historical first person shooter franchise that would shape the genre as we now know it. With graphics and gameplay similar to that of Quake, you explore 3D environments all while blasting foes with a variety of weaponry.. The game shows off the prowess of the Unreal Engine, a gaming engine that would find much popularity within the PC development community.
