In monetary economics, the quantity theory of money (QTM) states that the general price level of goods and services is directly proportional to the amount of money in circulation, or money supply.. The theory was challenged by Keynesian economics, but updated and reinvigorated by the monetarist school of economics. While mainstream economists agree that the quantity theory holds true in the ...

In mathematics, a recurrence relation is an equation that recursively defines a sequence or multidimensional array of values, once one or more initial terms are given: each further term of the sequence or array is defined as a function of the preceding terms.. The term difference equation sometimes (and for the purposes of this article) refers to a specific type of recurrence relation.

A word on historical English weddings. Traditionally, in front of the church door, the groom would, in front of witnesses, announce his bride's dower--that portion (usually 1/3) of his holdings she would be allowed to use should he die before she did (she could also inherit land and property, but this was a different thing).

For added complication and a point of further discussion, the DFARS statement at 227.7100(b) appears to be inconsistent with the Statute. This DFARS statement would appear to place "technical data" which is "computer software documentation" under DFARS Subpart 227.72 in lieu of 227.71. There are several potential problems with doing this.
