Operating System Concepts - Practice Exercises

operating system. The three ways to switch from between user-mode and kernel-mode in a general-purpose operating system are in response to a system call, an interrupt, or a signal. A system call occurs when a user program in user-space explicitly calls a kernel-defined "function" so the CPU must switch into kernel-mode.

Solution Operating System Concepts By Galvin

Purposes of an operating system: To supervise the execution of user programs to restrain the occurrence of errors and to avoid the misuse of computer and its resources is one important purpose of an operating system. Management of the functioning of the input and output devices is the third important purpose of an operating system.
