But while some of Six Degrees' assertions prove elementary when the impressive math fades, others give hard-science grounding to ideas that otherwise defy logic. Some network models seem screamingly reductive when applied to fields like sociology, but, as Watts writes, "While groups can

be categorized easily, individuals cannot."

Six Degrees: The Science Of A Connected Age - AUX

If you just take a look at the numbers, the six degrees of separation idea seems pretty plausible. Assuming everyone knows at least 44 people, and that each of those people knows an entirely new 44 people, and so on, the maths shows that in just six steps everyone could be connected to 44^6 , or 7.26 billion people - more than are alive on Earth today.

Are We Really All Connected by Just Six Degrees of Separation?

Six Degrees of Wikipedia. From these, the number of searches that required six or more degrees was 1.417 percent. It also stated that searches with no connection found was 1.07%, and this was attributed to certain articles being dead ends or having very few links. (Wenger's open source code is available on GitHub,...

Six degrees of separation - Wikipedia
