Section 1: Matter and Energy. Energy is released in some change of state Changes that release energy are called exothermic changes When water freezes or a gas becomes a liquid are examples of releasing energy Condensation is the change of a substance from a gas to a liquid.

Chapter 3: States of Matter - Manchester High School

Diffraction • Diffraction occurs when an object causes a wave to change direction and bend around it. The Behavior of Waves • Diffraction and refraction both cause waves to bend. The difference is that refraction occurs when waves pass through an object, while diffraction occurs when waves pass around an object.
