Solution of an equation. Every equation in the unknown x may be rewritten as $=$ by regrouping all terms in the left-hand side. It follows that the solutions of such an equation are exactly the zeros of the function .In other words, "zero of a function" is a phrase denoting a "solution of the equation obtained by equating the function to 0," and the study of zeros of functions is exactly the same ...

6 4. To answer this question, we can use either the FV or the PV formula. Both will give the same answer since they are the inverse of each other.

Solutions Manual - Georgia State University

In Tutorial 20: The Rectangular Coordinate System, we went over the basics of the rectangular coordinate system. In this tutorial we will be adding on to this by looking at graphing linear equations by plotting points that are solutions. Basically, when you graph, you plot solutions and connect the dots to get your graph.

Solutions: Dilutions. Page 3 Note about V_c , and a hidden assumption. V_d is simple enough; it is the amount of the dilute solution you are making. It may be tempting to think that V_c is the amount of the concentrated solution you have. WRONG. It is the amount you use.

Solutions: Dilutions. A. Dilutions: Introduction

The slide rule, or slipstick, is a mechanical analog computer. The slide rule is used mainly for multiplication and division, and also for "scientific" functions such as roots, logarithms and trigonometry, but usually not for addition or subtraction.. There are many different styles of slide rules. They are usually linear or circular. They have a standardised set of markings (called scales).
