## **Section 22 Introduction To Plants**

Genetics is the study of genes, and tries to explain what they are and how they work. Genes are how living organisms inherit features or traits from their ancestors; for example, children usually look like their parents because they have inherited their parents' genes. Genetics tries to identify which traits are inherited, and explain how these traits are passed from generation to generation.

Fuchsia (/ ˈ f juː ʃ ə /) is a genus of flowering plants that consists mostly of shrubs or small trees. The first, Fuchsia triphylla, was discovered on the Caribbean island of Hispaniola (Haiti and the Dominican Republic) about 1696–1697 by the French Minim monk and botanist, Charles Plumier, during his third expedition to the Greater Antilles. He named the new genus after German botanist ...

Notes. In the beginning () . Compare with Gen 2:4-25 in which the order of events is entirely different.. The Genesis 1 account conflicts with the order of events that are known to science. The earth and "heaven" are created together "in the beginning," whereas according to current estimates, the earth and universe are about 4.6 and 13.8 billion years old, respectively.
