Section 2-1 : Solutions and Solution Sets. We will start off this chapter with a fairly short section with some basic terminology that we use on a fairly regular basis in solving equations and inequalities. First, a solution to an equation or inequality is any number that, when plugged into the equation/inequality, will satisfy the equation ...

The roots of algebra can be traced to the ancient Babylonians, who developed an advanced arithmetical system with which they were able to do calculations in an algorithmic fashion. The Babylonians developed formulas to calculate solutions for problems typically solved today by using linear equations, quadratic equations, and indeterminate linear equations.
