Schwager Fundamental Analysis

Both Technical and Fundamental analysis are techniques used by investors globally to make stock related decisions. They are however different in several ways; fundamental analysis seeks to determine the intrinsic value of stocks using relevant data while fundamental analysis uses the historic market activities and trends to predict future price expectations.

Difference Between Technical and Fundamental Analysis ...

In finance, technical analysis is an analysis methodology for forecasting the direction of prices through the study of past market data, primarily price and volume. Behavioral economics and quantitative analysis use many of the same tools of technical analysis, which, being an aspect of active management, stands in contradiction to much of modern portfolio theory.

Technical analysis - Wikipedia

Technical Analysis is the forecasting of future financial price movements based on an examination of past price movements. Like weather forecasting, technical analysis does not result in absolute predictions about the future.

After looking at the crash of 1987 through the lens of a macro trader, I thought it would be interesting to examine how a bottom-up stock picker navigated the same environment. Who would be a better example than legendary hedge fund manager Julian Robertson. The Outstanding Investor Digest published excerpts from his letters in 1987, allowing us to follow him through the stormy year.
