In geometry, inversive geometry is the study of those properties of figures that are preserved by a generalization of a type of transformation of the Euclidean plane, called inversion. These transformations preserve angles and map generalized circles into generalized circles, where a generalized circle means either a circle or a line (loosely speaking, a circle with infinite radius).

Von Neumann was born Neumann János Lajos to a wealthy, acculturated and non-observant Jewish family (in Hungarian the family name comes first. His given names equate to John Louis in English). Von Neumann was born in Budapest, Kingdom of Hungary, which was then part of the Austro-Hungarian Empire. He was the eldest of three brothers; his two younger siblings were Mihály (English: Michael von ...
