Overview. The most basic type of integral equation is called a Fredholm equation of the first type, $\phi(x) = \int_a^b K(x,y)f(y)dy$. The notation follows Arfken. Here ϕ is an unknown function, f is a known function, and K is another known function of two variables, often called the kernel function. Note that the limits of integration are constant: this is what characterizes a Fredholm equation.
