Security Analysis

Security Analysis is a book written by professors Benjamin Graham and David Dodd of Columbia Business School, which laid the intellectual foundation for what would later be called value investing. The first edition was published in 1934, shortly after the Wall Street crash and start of the Great Depression. Among other terms, Graham and Dodd coined the term margin of safety in Security Analysis

Security analysis is the analysis of tradeable financial instruments called securities. It deals with finding the proper value of individual securities (i.e., stocks and bonds). These are usually classified into debt securities, equities, or some hybrid of the two. Tradeable credit derivatives are also securities. Commodities or futures contracts are not securities.
