A broad area of in the study of motion of compressible flows is dealt separately in the subject of “gas dynamics”. Many engineering tasks require the compressible flow applications typically in the design of a building/tower to withstand winds, high speed flow of air over cars/trains/airplanes etc. Thus, gas dynamics is the study of fluid

Chapter 7 Incompressible Flow Solutions Incompressible flows are by far the most common type of flows encountered in engineering problems. They are different than compressible flows mainly due to the missing equation of state. Density is not an unknown and pressure does not have any thermodynamic meaning. In an
