An electrical grid, or electric grid, is an interconnected network for delivering electricity from producers to consumers. It consists of Generating stations that produce electrical power; High voltage transmission lines that carry power from distant sources to demand centers; Distribution lines that connect individual customers.; Power stations may be located near a fuel source, at a dam site ...

Electrical grid - Wikipedia

In electronics, a wafer (also called a slice or substrate) is a thin slice of semiconductor, such as a crystalline silicon (c-Si), used for the fabrication of integrated circuits and, in photovoltaics, to manufacture solar cells. The wafer serves as the substrate for microelectronic devices built in and upon the wafer. It undergoes many microfabrication processes, such as doping, ion ...
