Entomological warfare (EW) is a type of biological warfare that uses insects to attack the enemy. The concept has existed for centuries and research and development have continued into the modern era. EW has been used in battle by Japan and several other nations have developed and been accused of using an entomological warfare program.

Aphids are small sap-sucking insects and members of the superfamily Aphidoidea. Common names include greenfly and blackfly, although individuals within a species can vary widely in colour. The group includes the fluffy white woolly aphids. A typical life cycle involves flightless females giving living birth to female nymphs without the involvement of males.

5 The Headless Mule. Brazilian folktales tell of a curious being known as the mula sem cabeça, which is the ghost of a woman—but which resembles a headless mule with fire spewing from its neck. The story goes that the beautiful wife of a farmer became the phantom headless mule, doomed to dash across the roads after midnight and then trample anyone who gets in its way.

Avatar is a genetically engineered human-Na'vi hybrid. James Cameron: The avatars in our story are living breathing bodies in a real world, they're not, as the word has sort of been appropriated by the cybersphere, they're not synthetic alter egos in cyberspace, just to be clear that its not a matrix type of story. And the avatar bodies are controlled by human driver who projects his ...
