In the old days of technology, screen resolution (also called display resolution) was not much of an issue. Windows came with a few preset options and to get higher resolution or more colors (or both) you would install a driver for your video card.

What do the 720p, 1080p, 1440p, 2K, 4K and 8K resolutions ...

The above shows the display (video card) settings as reported by your browser. Unfortunately, there is no way for this web page to find out what the capabilities of your monitor are, but for good image quality, the video card and monitor should be matched.
