Welcome to MathHomeworkAnswers.org, where students, teachers and math enthusiasts can ask and answer any math question. Get help and answers to any math problem including algebra, trigonometry, geometry, calculus, trigonometry, fractions, solving expression, simplifying expressions and more.

Write the following in function notation. y=3x-10. - Math ...
{x | x I, x ≤ 0} because I is the Integers Which is the equation in slope-intercept form for the line that passes through (-2, 15) and is perpendicular to 2x + 3y = 4?

Use set builder notation to represent the following set ...
A set is a finite or infinite collection of objects in which order has no significance, and multiplicity is generally also ignored (unlike a list or multiset). Members of a set are often referred to as elements and the notation a in A is used to denote that a is an element of a set A. The study of sets and their properties is the object of set theory.

From basic logic to axiomatic Set Theory. Curiously, set theory arose in the context of sets of real numbers related to the convergence of Fourier series...In 1829, Dirichlet had shown that a function always had a Fourier series converging to itself, under certain sufficient conditions (he considered periodic functions with finitely many extrema in every period and equal to the half-sum of ...

Logic and Set Theory - Numericana

From school, we know that although most math tasks have plain-English formulation, we still have to state an equation with x, or, sometimes, a system of equations with x, y, and maybe even more variables, to find a solution. Similarly, in a decision support system, we have to design a set of data ...
